

M2 | **ConsultPro** for B-Schools Course Curriculum

ConsultPro for B-Schools

5 Self-paced Modules, 32 Lectures

A complete prep program for Management Consulting and Strategy interviews at premier B-Schools, covering Case Interviews, Guesstimates, Structured thinking & Business Problem Solving, essential consulting frameworks, industry value chains, consulting communication & interview demonstrations by senior corporate professionals from Tier-1 B-Schools

#	Module	Module Contents	#Lectures
1	Business Foundations & Value Chains, Structured Problem Solving and Core Strategic Frameworks	Develop the structured thinking and analytical toolkit needed in consulting and strategy roles. Learn MECE principles, issue trees, hypothesis-driven problem solving, benchmarking, income statement analysis, and core business frameworks including Porter's Five Forces, Value Chain, BCG Matrix, the Pareto Principle and more. The module also covers industry value chains and applies these concepts to practical business scenarios.	8
2	Case Interview Excellence	Master the structured approach to solving consulting case interviews across profitability, market entry, growth strategy, pricing, operations, M&A, and other common business scenarios. Learn how to ask insightful clarifying questions, develop robust frameworks, synthesize findings, and communicate recommendations with the confidence expected by top consulting firms.	7
3	Guesstimates & Quantitative Reasoning	Develop a systematic approach to tackling estimation problems using logical assumptions, structured decomposition, and quantitative reasoning. Learn proven techniques to solve market sizing and guesstimate questions while clearly communicating your thought process under interview conditions.	5
4	Consulting Readiness & Executive Presence	Go beyond case solving to develop the professional skills expected of successful consulting candidates. Learn networking strategies, interview etiquette, executive communication, and stakeholder management while understanding how to navigate the consulting recruitment process. The module also includes advanced storytelling techniques to help MBA students effectively present their summer internships, prior work experience, leadership roles, live projects, and business school experiences in interviews.	3
5	Interview Demonstrations through Mock Sessions	Observe consulting interview demonstrations with guest IIM/ISB alum interviewers featuring case interviews & guesstimates. Learn correct styles of communication through Case diagnostics and guesstimate solutions. Communication techniques to demonstrate structured thinking, avoid common mistakes, and navigate real interview scenarios with confidence.	9

ConsultPro for B-Schools

Module 1: Business Foundations & Value Chains, Structured Problem Solving and Core Strategic Frameworks

Build the structured thinking and analytical toolkit used in consulting interviews. Learn core business fundamentals, strategic frameworks, hypothesis-driven problem solving, and industry value chains.

#	Lecture	Topics Covered
